Proposal – Modular Kitchen

Name : Mr. Vinay

Architects : Kinny Soni | Ujjval Panchal
Dilip Soni Architects

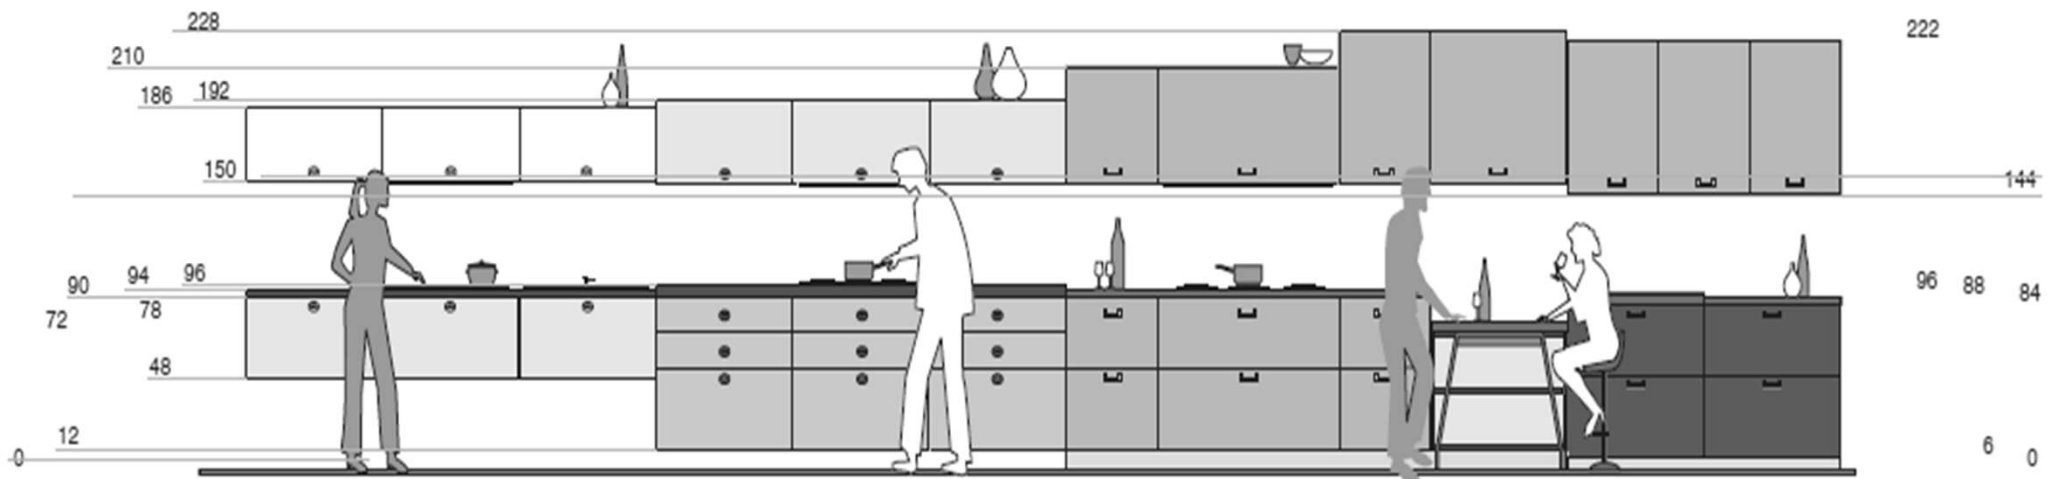

Alternative - 2

Perfect fusion of Italian art & Indian sensibilities

Talking about “Made in Italy” would be reductive limit yourself to elegant design, proposals for new material structural & technological innovation with a proposed type of construction of new concept where heights & depth of the elements you to optimize space and volume of stoware without distorting the concept of rationality and operating functional.

Senator Cucine & its program like Louisiana, Maryland, Miami, Vivere Italia and many hot collections present themselves with an examples of finishes, suggestions, material, multifunctional custom accessories, appliances, counter top, Sink & faucets and many more with absolute technological quality.

This is the Key to Flexibility.

Production Plant

Senator cucine

ITALY
Made in

The plant dedicated and designed specifically for the production of kitchens is at the cutting edge and equipped with the most modern and sophisticated production systems; it spans a surface area of 20,000 m² with specialized technologies, departments and engineers who are constantly updated to improve workflow and quality.

The main product distribution market is domestic in Italy (65%), and rapidly expanding exports concern more than 40 different countries. Export sales are notably to France, Germany, the United Kingdom, Greece, Turkey, India and the Arab Emirates.

Specialized engineers and operators produce thousands of units each day thanks to constantly updated and computerized production plants.

A CERTIFIED COMPANY

Satisfaction Assured

Senator cucine

Quality & Environmental policy

Engage ourselves:

- in continuous respect of actual environment legislation and the undersigned prescriptions,
- in prevention of pollution,
- in steady improvement in order to reduce the environment impact to a level corresponding to the use of the best available technology,
- in a suitable instruction and sensitisation of the whole staff on the environment problems,
- in containment of the consumption of natural resources and raw materials,
- in the correct management and the reduction of waste,
- in the prevention of risks of contamination and environment accident,
- in the use of materials and products at low environment impact,

These intents, through the Reexamination of Direction, find execution in a general planning with the aim to reach the taken engagements.

- Client satisfaction defined by managerial and operative policy
- Develop a culture of quality at every level of the organisation
- Monitor and test component characteristics at every phase of production
- Monitoring client satisfaction by post delivery questionnaires
- Involve staff in all ongoing quality development programmes
- Continually improve production process to achieve maximum efficiency
- Adopt an agreed method and process of problem resolution
- Keep partners and client aware of environmental policy developments by adopting a transparent process.

CERTIFICATION

Ecological panels

Spagnol Group is a member of the Ecological Panel Consortium. This is a commitment to use 100% recycled wood panels thus eliminating the felling of trees for its production process.

IdroLEB

LEB and the water repellent version, IdroLEB, represent the world's lowest emission Ecological Panels, made from 100% recycled wood material and certified by FSC.

Ecological panels: lowest emission board

KEY BENEFITS OF WORKING WITH SPAGNOL GROUP

- A comprehensive range of furniture from a single source supplier
- A wide range of quality face finishing materials is available
- More than 25 standard colours are available
- Constant product research and innovation
- A vast technical resource is your project partner
- Continual help with design and planning
- Export packaging and transportation management & processing
- Prototype development
- Quality components with continuity of supply
- On time production process
- Unbeatable synergy of price and quality
- Rapid response to 'urgent' needs
- High and low volume state of the art production capability
- Made In Italy
